Integrated residual current device (AC and DC detection, Type B characteristics) for your safety.

Type 2 connector Mennekes.

2-year warranty

Up to 7kw charging rate or approx. 40 km of range per hour

Smart LCD Screen details all charging information

Light Weight

5 meter EV cable length

Meets Australian & European standards

Temperature management for protecting the socket & EV

Auto charge recovery

Detection of wiring errors on the infrastructure side and checking of the ground conductor contact

Operating Temperature: -30°C to +50°C

IP65 Protection

How to Operate

How To Start Normal Charge

1. Firmly insert the power plug into outlet. Ensure the socket is rated to a current of 32Amp. The Power Green LED light will illuminate
2. Remove cap & insert the vehicle connector into your vehicle inlet. Ensure the plug is fully seated into the vehicle. The Green LED will illuminate
3. The device starts charging automatically when the green LED light starts to blink.

How To Stop Normal Charge

1. Disconnect the charging plug from the vehicle
2. Close protective cap of the EV charger plug
3. Disconnect power plug from the outlet
